SDSU eCHECKUP TO GO™
Version 3.0
VPAT™
Voluntary Product Accessibility Template®
Version 1.3

The purpose of the Voluntary Product Accessibility Template, or VPAT™, is to assist Federal contracting officials and other buyers in making preliminary assessments regarding the availability of commercial “Electronic and Information Technology” products and services with features that support accessibility. It is assumed and recommended that offerers will provide additional contact information to facilitate more detailed inquiries.

The first table of the Template provides a summary view of the Section 508 Standards. The subsequent tables provide more detailed views of each subsection. There are three columns in each table. Column one of the Summary Table describes the subsections of subparts B and C of the Standards. The second column describes the supporting features of the product or refers you to the corresponding detailed table, e.g., “equivalent facilitation.” The third column contains any additional remarks and explanations regarding the product. In the subsequent tables, the first column contains the lettered paragraphs of the subsections. The second column describes the supporting features of the product with regard to that paragraph. The third column contains any additional remarks and explanations regarding the product.

Date: March 1, 2016

Name of Product: eCHECKUP TO GO Programs

Summary Table		
<i>Criteria</i>	<i>Supporting Features</i>	<i>Remarks and explanations</i>
Section 1194.21 Software Applications and Operating Systems	Supports	Generally not applicable as the product is a web application and does not interfere with the operations of the OS, web browser, or assistive technology used to access the site. Pertinent features are supported, however (i.e., animation, color coding, blinking elements, electronic forms).
Section 1194.22 Web-based Internet Information and Applications	Supports with Exceptions	Mostly compliant, but with exceptions for multimedia alternatives and navigation links.
Section 1194.23 Telecommunications Products	Not Applicable	The product does not provide telephonic operations.
Section 1194.24 Video and Multi-media Products	Not applicable	Product is not a television, informational video or multimedia production.
Section 1194.25 Self-Contained, Closed Products	Supports	Generally Not Applicable as the product is not a self-contained, closed product. Pertinent features are supported, however (i.e., color coding).
Section 1194.26 Desktop and Portable Computers	Not Applicable	Product is not a desktop or portable computer and possesses no physical controls.
Section 1194.31 Functional Performance Criteria	Supports with exceptions	Product fully meets the criteria when used in combination with Compatible Assistive Technology. Audio information is presented by alternative means.
Section 1194.41 Information, Documentation and Support	Supports	Contact the eCHECKUP TO GO Development team for support information and/or documentation.

Section 1194.21 Software Applications and Operating Systems		
Criteria	Supporting Features	Remarks and explanations
(a) When software is designed to run on a system that has a keyboard, product functions shall be executable from a keyboard where the function itself or the result of performing a function can be discerned textually.	Not Applicable	The product is a web application and does not interfere with the operations of the OS or web browser used to access the site.
(b) Applications shall not disrupt or disable activated features of other products that are identified as accessibility features, where those features are developed and documented according to industry standards. Applications also shall not disrupt or disable activated features of any operating system that are identified as accessibility features where the application programming interface for those accessibility features has been documented by the manufacturer of the operating system and is available to the product developer.	Not Applicable	The product is a web application and does not interfere with the operations of the OS or web browser used to access the site.
(c) A well-defined on-screen indication of the current focus shall be provided that moves among interactive interface elements as the input focus changes. The focus shall be programmatically exposed so that Assistive Technology can track focus and focus changes.	Not Applicable	The product is a web application and does not interfere with the operations of the OS or web browser used to access the site.
(d) Sufficient information about a user interface element including the identity, operation and state of the element shall be available to Assistive Technology. When an image represents a product element, the information conveyed by the image must also be available in text.	Not Applicable	The product is a web application and does not interfere with the operations of the OS or web browser used to access the site.
(e) When bitmap images are used to identify controls, status indicators, or other programmatic elements, the meaning assigned to those images shall be consistent throughout an application's performance.	Not Applicable	Bitmap images are not used.
(f) Textual information shall be provided through operating system functions for displaying text. The minimum information	Not Applicable	The product is a web application and does not interfere with the operations of the OS or web

that shall be made available is text content, text input caret location, and text attributes.		browser used to access the site.
(g) Applications shall not override user selected contrast and color selections and other individual display attributes.	Not Applicable	The product is a web application and does not interfere with the operations of the OS or web browser used to access the site.
(h) When animation is displayed, the information shall be displayable in at least one non-animated presentation mode at the option of the user.	Supports	The content animated elements are also provided in text.
(i) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.	Supports	Color coding is never the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.
(j) When a product permits a user to adjust color and contrast settings, a variety of color selections capable of producing a range of contrast levels shall be provided.	Not Applicable	The product is a web application and does not interfere with the operations of the OS or web browser used to access the site.
(k) Software shall not use flashing or blinking text, objects, or other elements having a flash or blink frequency greater than 2 Hz and lower than 55 Hz.	Supports	The product does not use flashing or blinking text, objects, or other elements.
(l) When electronic forms are used, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	Supports	Form elements are accessed through the user's web browser. The product is a web application and does not interfere with the operations of the OS or web browser used to access the site.

Section 1194.22 Web-based Internet information and applications		
Criteria	Supporting Features	Remarks and explanations
(a) A text equivalent for every non-text element shall be provided (e.g., via "alt", "longdesc", or in element content).	Supports	Text equivalents are provided
(b) Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation.	Supports with Exceptions	When multimedia is present, alternate text with equivalent content is provided on the page. However, it is not synchronized to the presentation.
(c) Web pages shall be designed so that all information conveyed with color is also available without color, for example from context or markup.	Supports	Color coded information is never the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.
(d) Documents shall be organized so they are readable without requiring an associated style sheet.	Supports	Document is readable without the style sheet(s).
(e) Redundant text links shall be provided for each active region of a server-side image map.	Not Applicable	Image maps are not used.
(f) Client-side image maps shall be provided instead of server-side image maps except where the regions cannot be defined with an available geometric shape.	Not Applicable	Image maps are not used.
(g) Row and column headers shall be identified for data tables.	Supports	Tables are avoided. Row and column headers on DATA TABLES are identified.
(h) Markup shall be used to associate data cells and header cells for data tables that have two or more logical levels of row or column headers.	Not Applicable	Tables utilized do not have two or more logical levels of row or column headers.
(i) Frames shall be titled with text that facilitates frame identification and navigation	Not Applicable	Frames are not used.
(j) Pages shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.	Supports	Product contains no flashing or blinking elements.
(k) A text-only page, with equivalent information or functionality, shall be	Not Applicable	Compliance is accomplished in

provided to make a web site comply with the provisions of this part, when compliance cannot be accomplished in any other way. The content of the text-only page shall be updated whenever the primary page changes.		other ways.
(l) When pages utilize scripting languages to display content, or to create interface elements, the information provided by the script shall be identified with functional text that can be read by Assistive Technology.	Supports	“Noscript” alternatives are provided.
(m) When a web page requires that an applet, plug-in or other application be present on the client system to interpret page content, the page must provide a link to a plug-in or applet that complies with §1194.21(a) through (l).	Supports	Plug-ins provide links.
(n) When electronic forms are designed to be completed on-line, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	Supports	Field elements are clearly labeled. Fields can be navigated via mouse or keyboard (i.e., tabbing). Forms can be submitted via mouse or keyboard.
(o) A method shall be provided that permits users to skip repetitive navigation links.	Supports with Exceptions	The main page navigation is designed to be intrusive as the program must be completed in sequential order.
(p) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.	Not Applicable	Timed responses are not required.

Note to 1194.22: The Board interprets paragraphs (a) through (k) of this section as consistent with the following priority 1 Checkpoints of the Web Content Accessibility Guidelines 1.0 (WCAG 1.0) (May 5 1999) published by the Web Accessibility Initiative of the World Wide Web Consortium: Paragraph (a) - 1.1, (b) - 1.4, (c) - 2.1, (d) - 6.1, (e) - 1.2, (f) - 9.1, (g) - 5.1, (h) - 5.2, (i) - 12.1, (j) - 7.1, (k) - 11.4.

Section 1194.23 Telecommunications Products		
Criteria	Supporting Features	Remarks and explanations
(a) Telecommunications products or systems which provide a function allowing voice communication and which do not themselves provide a TTY functionality shall provide a standard non-acoustic connection point for TTYs. Microphones shall be capable of being turned on and off to allow the user to intermix speech with TTY use.	Not Applicable	The product does not provide telephonic operations.
(b) Telecommunications products which include voice communication functionality shall support all commonly used cross-manufacturer non-proprietary standard TTY signal protocols.	Not Applicable	The product does not provide telephonic operations.
(c) Voice mail, auto-attendant, and interactive voice response telecommunications systems shall be usable by TTY users with their TTYs.	Not Applicable	The product does not provide telephonic operations.
(d) Voice mail, messaging, auto-attendant, and interactive voice response telecommunications systems that require a response from a user within a time interval, shall give an alert when the time interval is about to run out, and shall provide sufficient time for the user to indicate more time is required.	Not Applicable	The product does not provide telephonic operations.
(e) Where provided, caller identification and similar telecommunications functions shall also be available for users of TTYs, and for users who cannot see displays.	Not Applicable	The product does not provide telephonic operations.
(f) For transmitted voice signals, telecommunications products shall provide a gain adjustable up to a minimum of 20 dB. For incremental volume control, at least one intermediate step of 12 dB of gain shall be provided.	Not Applicable	The product does not provide telephonic operations.
(g) If the telecommunications product allows a user to adjust the receive volume, a function shall be provided to automatically reset the volume to the default level after every use.	Not Applicable	The product does not provide telephonic operations.
(h) Where a telecommunications product	Not Applicable	The product does not provide

<p>delivers output by an audio transducer which is normally held up to the ear, a means for effective magnetic wireless coupling to hearing technologies shall be provided.</p>		<p>telephonic operations.</p>
<p>(i) Interference to hearing technologies (including hearing aids, cochlear implants, and assistive listening devices) shall be reduced to the lowest possible level that allows a user of hearing technologies to utilize the telecommunications product.</p>	<p>Not Applicable</p>	<p>The product does not provide telephonic operations.</p>
<p>(j) Products that transmit or conduct information or communication, shall pass through cross-manufacturer, non-proprietary, industry-standard codes, translation protocols, formats or other information necessary to provide the information or communication in a usable format. Technologies which use encoding, signal compression, format transformation, or similar techniques shall not remove information needed for access or shall restore it upon delivery.</p>	<p>Not Applicable</p>	<p>The product does not provide telephonic operations.</p>
<p>(k)(1) Products which have mechanically operated controls or keys shall comply with the following: Controls and Keys shall be tactilely discernible without activating the controls or keys.</p>	<p>Not Applicable</p>	<p>The product is a web application and does not have mechanically operated controls. Product does not interfere with keyboard, mouse, or assistive technology input.</p>
<p>(k)(2) Products which have mechanically operated controls or keys shall comply with the following: Controls and Keys shall be operable with one hand and shall not require tight grasping, pinching, twisting of the wrist. The force required to activate controls and keys shall be 5 lbs. (22.2N) maximum.</p>	<p>Not Applicable</p>	<p>The product is a web application and does not have mechanically operated controls. Product does not interfere with keyboard, mouse, or assistive technology input.</p>
<p>(k)(3) Products which have mechanically operated controls or keys shall comply with the following: If key repeat is supported, the delay before repeat shall be adjustable to at least 2 seconds. Key repeat rate shall be adjustable to 2 seconds per character.</p>	<p>Not Applicable</p>	<p>The product is a web application and does not have mechanically operated controls. Product does not interfere with keyboard, mouse, or assistive technology input.</p>
<p>(k)(4) Products which have mechanically operated controls or keys shall comply with the following: The status of all locking or toggle controls or keys shall be visually discernible, and discernible either through touch or sound.</p>	<p>Not Applicable</p>	<p>The product is a web application and does not have mechanically operated controls. Product does not interfere with keyboard, mouse, or assistive technology input.</p>

Section 1194.24 Video and Multi-media Products		
<i>Criteria</i>	<i>Supporting Features</i>	<i>Remarks and explanations</i>
a) All analog television displays 13 inches and larger, and computer equipment that includes analog television receiver or display circuitry, shall be equipped with caption decoder circuitry which appropriately receives, decodes, and displays closed captions from broadcast, cable, videotape, and DVD signals. As soon as practicable, but not later than July 1, 2002, widescreen digital television (DTV) displays measuring at least 7.8 inches vertically, DTV sets with conventional displays measuring at least 13 inches vertically, and stand-alone DTV tuners, whether or not they are marketed with display screens, and computer equipment that includes DTV receiver or display circuitry, shall be equipped with caption decoder circuitry which appropriately receives, decodes, and displays closed captions from broadcast, cable, videotape, and DVD signals.	Not applicable	Product is not a television.
(b) Television tuners, including tuner cards for use in computers, shall be equipped with secondary audio product playback circuitry.	Not applicable	Product is not a television tuner.
(c) All training and informational video and multimedia productions which support the agency's mission, regardless of format, that contain speech or other audio information necessary for the comprehension of the content, shall be open or closed captioned.	Not applicable	Product is not an informational video and multimedia production.
(d) All training and informational video and multimedia productions which support the agency's mission, regardless of format, that contain visual information necessary for the comprehension of the content, shall be audio described.	Not applicable	Product is not an informational video and multimedia production.
(e) Display or presentation of alternate text presentation or audio descriptions shall be user-selectable unless permanent.	Not applicable	Product is not an informational video or multimedia production.

Section 1194.25 Self-Contained, Closed Products		
<i>Criteria</i>	<i>Supporting Features</i>	<i>Remarks and explanations</i>
(a) Self contained products shall be usable by people with disabilities without requiring an end-user to attach Assistive Technology to the product. Personal headsets for private listening are not Assistive Technology.	Not Applicable	Product is not a self-contained, closed product. The product is a web application and does not interfere with the operations of the OS, web browser, or assistive technology used to access the site.
(b) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.	Not Applicable	Timed responses not required. Product is not a self-contained, closed product. The product is a web application and does not interfere with the operations of the OS, web browser, or assistive technology used to access the site.
(c) Where a product utilizes touchscreens or contact-sensitive controls, an input method shall be provided that complies with §1194.23 (k) (1) through (4).	Not Applicable	Product does not utilize touchscreens or contact-sensitive controls Touchscreen is not required. Product is not a self-contained, closed product. The product is a web application and does not interfere with the operations of the OS, web browser, or assistive technology used to access the site.
(d) When biometric forms of user identification or control are used, an alternative form of identification or activation, which does not require the user to possess particular biological characteristics, shall also be provided.	Not Applicable	Biometric controls are not used. Product is not a self-contained, closed product. The product is a web application and does not interfere with the operations of the OS, web browser, or assistive technology used to access the site.
(e) When products provide auditory output, the audio signal shall be provided at a standard signal level through an industry standard connector that will allow for private listening. The product must provide the ability to interrupt, pause, and restart the audio at anytime.	Not Applicable	Audio output is mediated by the user's OS, web browser, or assistive technology. Product is not a self-contained, closed product. The product is a web application and does not interfere with the operations of the OS, web browser, or assistive technology used to access the site.

<p>(f) When products deliver voice output in a public area, incremental volume control shall be provided with output amplification up to a level of at least 65 dB. Where the ambient noise level of the environment is above 45 dB, a volume gain of at least 20 dB above the ambient level shall be user selectable. A function shall be provided to automatically reset the volume to the default level after every use.</p>	<p>Not Applicable</p>	<p>Product does not deliver voice output in a public area. Product is not a self-contained, closed product. The product is a web application and does not interfere with the operations of the OS, web browser, or assistive technology used to access the site.</p>
<p>(g) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.</p>	<p>Supports</p>	<p>Color coding is never the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.</p>
<p>(h) When a product permits a user to adjust color and contrast settings, a range of color selections capable of producing a variety of contrast levels shall be provided.</p>	<p>Not Applicable</p>	<p>Product is not a self-contained, closed product. The product is a web application and does not interfere with the operations of the OS, web browser, or assistive technology used to access the site.</p>
<p>(i) Products shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.</p>	<p>Not Applicable</p>	<p>Product is not a self-contained, closed product. The product is a web application and does not interfere with the operations of the OS, web browser, or assistive technology used to access the site.</p>
<p>(j) (1) Products which are freestanding, non-portable, and intended to be used in one location and which have operable controls shall comply with the following: The position of any operable control shall be determined with respect to a vertical plane, which is 48 inches in length, centered on the operable control, and at the maximum protrusion of the product within the 48 inch length on products which are freestanding, non-portable, and intended to be used in one location and which have operable controls.</p>	<p>Not Applicable</p>	<p>Product is not freestanding, non-portable, nor intended to be used in one location. Product is not a self-contained, closed product. The product is a web application and does not interfere with the operations of the OS, web browser, or assistive technology used to access the site.</p>
<p>(j)(2) Products which are freestanding, non-portable, and intended to be used in one location and which have operable controls shall comply with the following: Where any operable control is 10 inches or less behind the reference plane, the height</p>	<p>Not Applicable</p>	<p>Product is not freestanding, non-portable, nor intended to be used in one location. Product is not a self-contained, closed product. The product is a web application and does not</p>

<p>shall be 54 inches maximum and 15 inches minimum above the floor.</p>		<p>interfere with the operations of the OS, web browser, or assistive technology used to access the site.</p>
<p>(j)(3) Products which are freestanding, non-portable, and intended to be used in one location and which have operable controls shall comply with the following: Where any operable control is more than 10 inches and not more than 24 inches behind the reference plane, the height shall be 46 inches maximum and 15 inches minimum above the floor.</p>	<p>Not Applicable</p>	<p>Product is not freestanding, non-portable, nor intended to be used in one location. Product is not a self-contained, closed product. The product is a web application and does not interfere with the operations of the OS, web browser, or assistive technology used to access the site.</p>
<p>(j)(4) Products which are freestanding, non-portable, and intended to be used in one location and which have operable controls shall comply with the following: Operable controls shall not be more than 24 inches behind the reference plane.</p>	<p>Not Applicable</p>	<p>Product is not freestanding, non-portable, nor intended to be used in one location. Product is not a self-contained, closed product. The product is a web application and does not interfere with the operations of the OS, web browser, or assistive technology used to access the site.</p>

Section 1194.26 Desktop and Portable Computers		
Criteria	Supporting Features	Remarks and explanations
(a) All mechanically operated controls and keys shall comply with §1194.23 (k) (1) through (4).	Not Applicable	Product is not a desktop or portable computer and possesses no physical controls.
(b) If a product utilizes touchscreens or touch-operated controls, an input method shall be provided that complies with §1194.23 (k) (1) through (4).	Not Applicable	Product does not utilize touchscreens or contact-sensitive controls Touchscreen is not required. The product is a web application and does not interfere with the operations of the OS, web browser, or assistive technology used to access the site.
(c) When biometric forms of user identification or control are used, an alternative form of identification or activation, which does not require the user to possess particular biological characteristics, shall also be provided.	Not Applicable	Biometric controls are not used. The product is a web application and does not interfere with the operations of the OS, web browser, or assistive technology used to access the site.
(d) Where provided, at least one of each type of expansion slots, ports and connectors shall comply with publicly available industry standards	Not Applicable	Product is not a desktop or portable computer.

Section 1194.31 Functional Performance Criteria		
Criteria	Supporting Features	Remarks and explanations
(a) At least one mode of operation and information retrieval that does not require user vision shall be provided, or support for Assistive Technology used by people who are blind or visually impaired shall be provided.	Supports when combined with Compatible Assistive Technology	Product fully meets the criteria when used in combination with Compatible Assistive Technology. For example, product may be used with a compatible screen reader.
(b) At least one mode of operation and information retrieval that does not require visual acuity greater than 20/70 shall be provided in audio and enlarged print output working together or independently, or support for Assistive Technology used by people who are visually impaired shall be provided.	Supports when combined with Compatible Assistive Technology	Product fully meets the criteria when used in combination with Compatible Assistive Technology. For example, product may be used with a compatible screen reader.
(c) At least one mode of operation and information retrieval that does not require user hearing shall be provided, or support for Assistive Technology used by people who are deaf or hard of hearing shall be provided	Supports	All information presented via audio is also presented in-text.
(d) Where audio information is important for the use of a product, at least one mode of operation and information retrieval shall be provided in an enhanced auditory fashion, or support for assistive hearing devices shall be provided.	Supports with Exceptions	All information presented via audio is also presented in-text. Missing audio does not prevent the user from using/completing the program. All information and navigation cues are presented visually and in-text.
(e) At least one mode of operation and information retrieval that does not require user speech shall be provided, or support for Assistive Technology used by people with disabilities shall be provided.	Not applicable.	Product does not require user speech.
(f) At least one mode of operation and information retrieval that does not require fine motor control or simultaneous actions and that is operable with limited reach and strength shall be provided.	Supports when combined with Compatible Assistive Technology	Product requires the use of a keyboard or text-entry device, and a mouse or screen pointer device. Product fully meets the criteria when used in combination with Compatible Assistive Technology.

Section 1194.41 Information, Documentation and Support		
<i>Criteria</i>	<i>Supporting Features</i>	<i>Remarks and explanations</i>
(a) Product support documentation provided to end-users shall be made available in alternate formats upon request, at no additional charge	Supports	Contact the eCHECKUP TO GO Development team for support information and/or documentation.
(b) End-users shall have access to a description of the accessibility and compatibility features of products in alternate formats or alternate methods upon request, at no additional charge.	Supports	Contact the eCHECKUP TO GO Development team for support information and/or documentation.
(c) Support services for products shall accommodate the communication needs of end-users with disabilities.	Supports	Contact the eCHECKUP TO GO Development team for support information and/or documentation.
